Valeria Garzón Triana

PRODUCT DESIGNER | UX/UI | FINTECH & B2B

Bogotá, Colombia | +57 350 528 7642 | valeria.garzont@gmail.com
Portfolio: valeriagt.github.io/portafolio/en/ | LinkedIn: linkedin.com/in/valeria-garzon-triana-productdesigner/

PROFESSIONAL SUMMARY

Product Designer with 5+ years of experience across fintech, proptech, and B2B products. I connect user needs with business goals through research, product analytics, and outcome-focused design. I translate qualitative insights and usage data into clear product decisions, prototypes, and user-tested solutions. I communicate design rationale clearly and align business, engineering, and stakeholder teams throughout the product lifecycle. Proficient in AI-assisted design workflows, I use Claude Code and Lovable to explore concepts and accelerate prototyping while grounding decisions in user evidence.

CORE SKILLS

Product design, UX/UI design, user research, user interviews, usability testing, product metrics, behavioral analytics, Databricks, user flows, information architecture, wireframing, interactive prototyping, design systems, stakeholder alignment, developer collaboration, impact and effort prioritization, backlog management, AI-assisted prototyping, prompt design, Claude Code, Lovable, Figma, Maze, Dovetail, Useberry, HTML, CSS, JavaScript.

PROFESSIONAL EXPERIENCE

Skandia Colombia | Sep 2022 - Oct 2026
Web UX Designer · Product Designer and Product Owner responsibilities

Go by Skandia - MVP for financial advisors

- Led research through interviews with 10 financial advisors and 10 clients, and explored finfluencer profiles.
- Facilitated a needs and barriers workshop with 12 users and conducted usability tests of the prototype with 8 participants in Maze; findings informed the structure and flows.
- Designed flows, wireframes, and prototypes for digital advisors, and supported the development team and users during launch and production iterations.
- Managed the MVP backlog as Product Owner, prioritizing by impact and effort with business and engineering.

Client portal redesign - proposal to encourage recurring use

- Redesigned the portal based on user testing, incorporated feedback in each iteration, and delivered AI-assisted functional prototypes to developers.
- Analyzed six months of usage data in Databricks to propose portfolio management improvements; the proposal and prototype were under review when my involvement ended.

Nivelics SAS | May 2022 - Jun 2022
UX/UI Designer · Freelance

- Designed screens, user flows, wireframes, and high-fidelity prototypes for an internal user events portal.
- Organized information and delivered prototypes to support client review and implementation with developers.

Metrocuadrado | Jan 2021 - Aug 2022
UI Designer

- Redesigned back-office modules for real estate agencies and construction companies, focusing on information organization and B2B workflows.
- Collaborated with product and development teams to align interface proposals with business needs.

Museo Carmona | Sep 2021 - Dec 2021
Web Designer and Developer · Freelance

- Designed and built the museum website with HTML, CSS, and JavaScript, adapting it for mobile screens.
- Organized the collection by technique and defined the visual narrative with the artist. Based on his feedback, art representatives could browse the works easily and in an organized way.

EDUCATION

Industrial Design | Universidad de Bogotá Jorge Tadeo Lozano | 2019

UX/UI Design Bootcamp | BIT - Bogotá Institute of Technology | 2026
