# Product Designer

**UX/UI** • **Product Owner** • **Fintech & B2B**

UX/UI Designer and Product Owner focused on creating digital experiences with measurable impact. Specialized in fintech platforms and B2B tools that improve operational efficiency. I combine user research, usability testing, and strategic product management to ensure each solution delivers tangible value. My collaborative, user-centered approach enables me to lead complex projects in multidisciplinary teams, from concept through post-launch iteration.

## EXPERIENCE

### Skandia Colombia
**Sep 2022 - Oct 2026**

**Web UX Designer · Product Designer and Product Owner responsibilities**

**MVP design & management** — *Go by Skandia, a platform for financial advisors*

- Led research: interviewed 10 financial advisors and 10 clients, and explored finfluencer profiles.
- Facilitated a needs and barriers workshop with 12 users and usability-tested the prototype with 8 participants in Maze; findings informed the structure and flows.
- Designed flows, wireframes, and prototypes for digital advisors, and supported the development team and users during launch and production iterations.
- Managed the MVP backlog as Product Owner, prioritizing by impact and effort with business and engineering.

**Client portal redesign** — *proposal to encourage recurring use*

- Redesigned the portal based on user testing, incorporating feedback in each iteration and delivering AI-assisted prototypes to developers for implementation.
- Analyzed portal usage in Databricks to propose improvements to portfolio management; the proposal and prototype were under review when my involvement ended.

### Nivelics SAS
**May 2022 - Jun 2022**

**UX/UI Designer · Freelance**

- Designed screens, user flows, wireframes, and high-fidelity prototypes for an internal user events portal.
- Organized information and delivered prototypes to support client review and implementation with developers.

### Metrocuadrado
**Jan 2021 - Aug 2022**

**UI Designer**

- Redesigned back-office modules for real estate agencies and construction companies, focusing on information organization and B2B workflows.
- Collaborated with product and development to align interface proposals with business needs.

### Museo Carmona
**Sep 2021 - Dec 2021**

**Web Designer & Developer · Freelance**

- Designed and built the museum website with HTML, CSS, and JavaScript, adapting it for mobile screens.
- Organized the collection by technique and defined the visual narrative with the artist. Based on his feedback, art representatives could browse the works easily and in an organized way.

## EDUCATION

**Industrial Design** — 2019
Universidad de Bogotá Jorge Tadeo Lozano

**UX/UI Design Bootcamp** — 2026
BIT - Bogotá Institute of Technology
