

Valeria Garzón Triana

Product Designer | UX/UI · Product Owner · Fintech & B2B

Colombia | +57 350 528 7642 | valeria.garzont@gmail.com

Portfolio: valeriagt.github.io/portafolio/ | LinkedIn: linkedin.com/in/valeria-garzon-triana-productdesigner/

PROFESSIONAL PROFILE

UX/UI Designer and Product Owner focused on creating digital experiences with measurable impact. Specialized in designing fintech platforms and B2B tools that improve operational efficiency. I combine user research, validation through usability testing and strategic product management to ensure every solution delivers tangible value. My collaborative approach and focus on users enable me to lead complex projects within multidisciplinary teams, from concept development to post-launch iteration.

PROFESSIONAL EXPERIENCE

Skandia Colombia | Sep 2022 - Oct 2026

UX Web Designer · Product Designer and Product Owner responsibilities

MVP design and management — Go by Skandia, a platform for influencer advisors

- Led research through interviews with 10 financial advisors and 10 clients, and exploration of influencer profiles.
- Facilitated a needs and barriers workshop with 12 users and conducted prototype usability tests with 8 participants in Maze; the findings informed the structure and flows.
- Designed flows, wireframes and prototypes for digital advisors, and supported the development team and users during launch and production iterations.
- Managed the MVP backlog as Product Owner, prioritizing by impact and effort with business and engineering.

Client portal redesign — a proposal to encourage recurring use

- Redesigned the portal based on user testing: incorporated feedback in each iteration and handed off prototypes built through vibe coding to the development team for implementation.
- Analyzed portal usage in Databricks to propose improvements to portfolio management; the proposal and prototype remained under review when my involvement ended.

Nivelics SAS | May 2022 - Jun 2022

UX/UI Designer (Freelance)

- Designed screens, flows, wireframes and high-fidelity prototypes for an events portal for internal users.
- Organized information and delivered prototypes to support client review and implementation with the development team.

Metrocuadrado | Jan 2021 - Aug 2022

UI Designer

- Redesigned back-office modules for real estate agencies and construction companies, focusing on information organization and B2B operational flows.
- Collaborated with product and development teams to align interface proposals with business needs.

Museo Carmona | Sep 2021 - Dec 2021

Web Designer and Developer (Freelance)

- Designed and built the museum website with HTML, CSS and JavaScript, adapting it to mobile screens.
- Organized the collection by technique and defined the visual narrative with the artist. According to his feedback, art representatives were able to browse the works easily in an organized presentation.
